"James Bond meets  
 A confederacy of  
 Dunces."

FICTION

"Atlas Shrugged with professional wrestlers. A whimsical window into the world of Big Government, spy movies, and cavity searches."

- Christine Morabito, President,  
 Greater Boston Tea Party

**FULL ASYLUM**

The economy has crashed (again), the Nanny State is out of control, and software engineer Gimbel O'Hare just wants to do his job. Not easy, given that his boss is out to get him, the Department of Justice has him under surveillance, and one of his co-workers is suing him for sexual harassment. He deals with the stress by indulging in spy movies, an obsession that leads him on an off-the-wall journey around metro-Washington. From the ruins of a once fashionable mall to a psychiatric ward in a military hospital, Gimbel is on the trail of a dangerous – and possibly imaginary – conspiracy to steal a presidential election and fundamentally transform America.

Michael Isenberg has had a checkered career as a Six Sigma Black Belt, weapons merchant, astrophysicist, and manufacturer of cigarette butts. He resides in New England with 844 books and an elderly cat that bites people.
